BANKNOTE ENHANCER DP7300 SD

The front-loading BANKNOTE VALORIZER DP7300 SD, equipped with a touch control panel and double CIS sensor (sensors with contact image), counts, verifies and values the total of mixed banknotes inserted with the counting reports. This is for EURO, US Dollars, British Pounds and Swiss Francs. Commands and functions are set with the simple touch of a finger, while the front display allows the reading of all the amounts and / or pieces counted. If optionally connected to the external printer, it prints the receipt of the counts made on thermal paper. Already updated to all the new and old euro banknotes Future updates to the new banknotes are simple and immediate via USB or SD card. It can be opened for cleaning the sensors thanks to a lever on the left side that allows it to be inspected. Other CURRENCIES are also available on request. A printer and external monitor are also available on request.

Successfully approved for forgery verification by the European Central Bank.
